FOREWORD

This special Bibliography of Federal government publications has been compiled by Information Canada following discussions with the Canadian School Library Association (C.L.A.). It includes approximately five hundred titles dating from January 1967 to June 1973--annotated to indicate content, general format and depth of treatment--and chosen because of their direct relationship to high school curriculae.

A French language edition of this Bibliography is available from Information Canada. It contains items published only in the French language and those that are published bilingually. However, each entry in both editions indicates if the item is available in the other official language.

This is the beginning of a proposed continuing service to high school librarians. Therefore, your suggestions regarding how it could be made more useful to you would be appreciated. Please address your comments to:

REPORT

The purpose of this report is to provide a comprehensive overview of the current state of the project and to identify the key challenges and opportunities for the future. The report is organized into several sections, each focusing on a different aspect of the project. The first section provides a general overview of the project and its objectives. The second section discusses the current state of the project and the progress made to date. The third section identifies the key challenges and opportunities for the future. The fourth section provides recommendations for the future and a timeline for the project. The fifth section provides a summary of the report and its findings.

ORGANIZATION

This bibliography is arranged in three sections: The Subject Index is organized according to broad curriculum headings used by most Canadian high schools. Part I contains the priced publications which may be ordered from Information Canada. Part II contains free publications which must be ordered directly from the departments and agencies concerned.

Items within Parts I and II are arranged in alphabetical order by departments and agencies, and each entry, in turn, is assigned an index number as a location device for the subject index. The numbers which appear in brackets in the subject index are suggested grade levels. These are usually inclusive (e.g. grades 11-13) to take into account the variations in grade levels within the Canadian school system. Thus, a publication listed as of value for grades 11 to 13 may be interpreted as suitable for senior students.

HOW TO ORDER

Part I priced publications may be purchased directly from Information Canada, Ottawa. An Order Form is provided for your convenience.

Usually, prepayment is required for all orders. To avoid waiting for quotations and sending small individual remittances, those who expect to purchase Canadian government publications regularly may find it convenient to open a Deposit Account with Information Canada.

On this basis your orders will be filled as received and the charge deducted from your account balance--which should be established in an amount sufficient to cover your anticipated monthly purchases. You will be advised periodically of the balance to your credit. Whenever this credit is reduced to \$10.00 minimum, additional funds will be required in order to maintain uninterrupted services. To open a Deposit Account write to:

Financial Services Division,
Information Canada,
171 Slater St.,
Ottawa, Ontario.
K1A 0S9

Cheques or money orders should be made payable to the "Receiver General for Canada. On a/c Information Canada". Postage stamps cannot be accepted.

Although some of the titles listed are already in short supply and may not be reprinted, you will always be informed of the status of each publication by Information Canada.

Cost of postage is included in the selling price.

All prices are subject to change without notice.

Part II free publications must be requested directly from the departments and agencies concerned. Addresses are provided for each department and agency. Please note special addresses which accompany some titles. Some free publications are limited in number and each department reserves the right to limit the number of copies supplied. Publications are distributed on a "first-come-first-served" basis.

PLEASE: ALWAYS INCLUDE IN YOUR ORDERS THE CATALOGUE NUMBER
